Yanfeng Zhao

PhD Student in Computer Science, Florida State University

yz24f@fsu.edu · *+1 850-900-7156*

Research Interests

My research focuses on **wearable and ubiquitous computing**, particularly smart textiles and soft on-body devices for health care, wellness, and human–computer interaction. I develop wearable systems for **multimodal physiological and behavioral sensing**, and explore textile-based mechanisms for sensing, actuation, and intelligent interaction. My work combines sensor and hardware design, embedded systems, signal processing, applied ML and prototyping tools to make wearable interfaces reliable, seamless, and easier to build. More broadly, I am interested in enabling soft wearable devices to support continuous sensing and interactive computing closely integrated with the human body and human activity. I am advised by Prof. Te-Yen Wu in the MakeX Lab, Department of Computer Science, Florida State University.

Education

Florida State University *Tallahassee, FL, USA*

Doctor of Philosophy – Computer Science *Aug. 2024 - Expected Aug. 2029*

MakeX Lab. Advisor: Te-Yen Wu. Research focus: Human–Computer Interaction, Ubiquitous Computing, and Applied Machine Learning.

Northwest University *Xi'an, China*

Bachelor of Science – Electronic Information Science and Technology *Sept. 2020 - July 2024*

Joint program with the University of Essex, UK. Thesis: Gait Recognition Based on Millimeter-Wave Radar.

Research Experience

Undergraduate Research Assistant, Northwest University *Xi'an, China*

Advisor: Xiaojiang Chen and Liqiong Chang *Oct. 2021 - July 2022*

Wearable RF and biosensing systems for noninvasive physiological monitoring.

Selected Publications

[3] Textro: A Prototyping Toolkit for Solderless and Chipless Smart Textile Interfaces

The 39th Annual ACM Symposium on User Interface Software and Technology. **(UIST'26)**

Yanfeng Zhao, *Te-Yen Wu*

[2] Mammal: Supporting Breastfeeding Monitoring Through Computational Garments with Inter-Body Sensing

Proceedings of the ACM on Interactive, Mobile, Wearable and Ubiquitous Technologies. **(IMWUT/Ubicomp'26)**

Yanfeng Zhao, *Morgan Geck, Kate Fernandez, Madison Nicole Jones, Xia Zhou, Jessica L. Ridgway, Te-Yen Wu*

[1] Motion-Sequence Authentication System: Guard for Smart Phones

International Conference on Algorithms and Architectures for Parallel Processing, 422–441. Springer. **(ICA3PP'21)**

Yuzheng Dong, ***Yanfeng Zhao****, Ziyue Wang, Juan He, Liubin Zhu*

POSTERS AND EXHIBITIONS

[1] C.A.R.E: Computerized Apparel for Real-Time Evaluation of Mother and Infants during Breastfeeding and Kangaroo Care

International Textile and Apparel Association Design Exhibition. **(ITAA'25)**

Jessica L. Ridgway, Morgan Geck, Te-Yen Wu, ***Yanfeng Zhao****, Madison Nicole Jones*

Teaching Experience

Graduate Teaching Assistant, Florida State University *Tallahassee, FL, USA*
Department of Computer Science *Nov. 2025 - Now*
Teaching assistant for CGS2100 Microcomputer, CIS4930 Algorithm Complexity, COP4521 Python Programming, and CEN4020 Software Engineering I.

Awards and Scholarships

Northwest University Acedemic Scholarship *2021, 2022, 2023*
Northwest University, Xi'an, China. Awarded in three consecutive academic years.

NWU-Essex Joint Program Language Scholarship *2023*
Northwest University and University of Essex joint program.

Technical Skills

- **Fabrication and Sensing:** Smart textile fabrication, wireless sensing, sensor characterization, physiological signal processing
- **Hardware and RF:** PCB and antenna design, RF sensing, electromagnetic simulation (Ansys HFSS, Altium Designer)
- **Programming:** Python, MATLAB, C, Verilog, TensorFlow, PyTorch, Arduino, Raspberry Pi

Languages

- **Chinese:** Native language
- **English:** Fluent (speaking, reading, writing)

Academic Service

Reviewer, ACM Symposium on User Interface Software and Technology **(UIST 2026)**
Student Organizer, FSU CS Student Seminar

Presentations

FSU CS Student Seminar, Florida State University *Oct. 2025*
Textro: A Prototyping Toolkit for Solderless and Chipless Smart Textile Interfaces

CS Expo, Florida State University *Apr. 2025*
Mammal: Supporting Breastfeeding Monitoring Through Computational Garments with Inter-Body Sensing
